

Ant Zeitstempel

2007-06-26 10:21:28

Notiz: Zeitstempel werden in Ant durch das `<tstamp>` Tag definiert:

```
<target name="jar"> <tstamp> <format property="version.timestamp";
pattern="yyyyMMdd_HHmmss" /> </tstamp> <jar
jarfile="{jar-destination}/{jar-name}-${version.timestamp}.jar"> <fileset
dir="{classes}" includes="*" /> <manifest> <attribute
name="Version" value="{version.timestamp}" /> </manifest> </jar> </target>
```
